PCS Setting the Standard for Securitisation

PCS – who we are

PCS

Prime Collateralised Securities (PCS) was set up by market stakeholders as an independent, not-for-profit initiative to help rebuild a safe securitisation market in Europe

Our Mission

- The aim of the Prime Collateralised Securities ("PCS") initiative is to strengthen the securitisation market as a sustainable investment and funding tool for both investors and originators, promote growth in the real economy and improve market resilience by supporting standards of quality, transparency, and simplicity
- The PCS initiative as an independent entity has, since its foundation in 2012, sought to define and promote standards of "best practice" in both the "true sale" and "risk transfer" asset backed markets: standards of quality, transparency and simplicity. It did this initially through its labels and now through its work as a verification agent but also through its advocacy and thought leadership
- PCS is committed to retaining its not-for-profit status

PCS

Who are we?

Strong Team of Securitisation Experts

- We are a team of experts with an average experience of more than 27 years in securitisation markets
- We are based in 7 cities across Europe and have offices in London and Paris
- Our team members are fluent in several European languages including English, French, German, Italian, Dutch, Spanish, Greek & Polish

PCS actively supports European securitisation

How does PCS support the market?

Since the introduction of STS in 2019, we have been mandated more than 600 STS verifications across Europe covering a wide range of deal types and asset classes in every jurisdiction from which an STS notification has been done.

- Third Party Verification Agent
- Provider of LCR and CRR assessments
- Information resource

PCS

has an active role in European securitisation markets

How does PCS contribute?

- Responding to consultations
- Publications
- Newsletters
- White Papers
- Webinars and seminars
- Criteria Papers
- Active dialogue & advocacy with policy makers
- Active dialogue with prudential and market regulators
- Hosting annual symposia in 13 countries across Europe
- Online education via the <u>Great Library</u> and <u>Youtube</u>

What do thirdparty verification agents do?

- A third-party verification agent verifies the STS status of a securitisation at the request of an originator
- The verification agent does this by checking each and every STS criterion to ensure that it has been met
- In checking each criterion, the third-party verification agent brings into play its expertise of both securitisation and the STS rules, derived from its experience over many transactions as well as its ongoing dialogue with regulatory authorities
- By informing investors and potential investors of the independent third-party verification of its transaction, the originator provides comfort to investors but also assists *all investors* (regulated or not) to fulfill their legally required due diligence obligations

How are thirdparty verification agents regulated?

- Only authorised entities may be third party verification agents
- In authorising a third-party verification agent, the national competent authority checks its internal governance and codes of conduct as well as the verification agents processes and procedures
- To guarantee the independence of third-party verification agents, the regulations prohibit them from providing any advisory or other services to originators and requires them to have an internal code of conduct that prevents or manages any conflict of interest
- The authorisation of a third-party verification agent by any national competent authority in the European Union entitles that agent to operate in all other member states of the EU
- Only third-party verification agents authorised by the UK FCA can verify UK STS securitisations
- PCS is authorised as a third-party verification agent by the French Autorité des Marchés Financiers and the British Financial Conduct Authority

Who does it help?

Who does it help and how?

Originators & Sponsors

As an expert verification

- Lowers recharacterisation risk
- Adds to the internal compliance process
- Brings cross-border, cross-asset class and regulatory knowledge to the table

As a mitigant to the threat of sanctions

- 10 % of worldwide turn-over
- €5,000,000 personal fines
- Requirement of deliberate act or negligence

Investors

•Socialises the cost of compliance (art.5.3.c)

- Is the answer to the question of what lies between relying "to an appropriate extent" and not "solely or mechanistically" (art. 5.3.c)
- Brings cross-border, cross-asset class and regulatory knowledge to the table
- Produces a report that allows an investor to double-check either a factual assertion or an interpretation
- The reports are public so available pre-pricing, at closing and in the secondary market

Regulators

- Criteria interpretations lies with NCAs
- Third party verification agents, as regulated independent bodies, can have interpretation discussions for the whole market on a basis of trust
- Risk of regulatory fragmentation undermining the European benchmark status of STS
- Third party verification agents operating cross-border and cross-asset class can identify inconsistencies before they become a threat to the system

PCS Setting the Standard for Securitisation

PCS – our services

PCS Services

What do we offer? We offer the following Verifications and Assessments:

- True Sale STS Verification
- ABCP STS Verification
- CRR Assessment
- LCR Assessment
- PCS+ (Verification + CRR and/or LCR)
- Mixed Transaction STS Verification
- Synthetic STS Verification

Why use PCS?

• We have verified more than 800 transactions including more than 570 STS transactions

- We have extensive experience of the STS criteria grounded in our constant interaction with regulators and market participants
- Our experience across countries and asset classes allows originators to join in the market and regulatory consensus around STS
- There are 103 criteria in true sale and between 145 and 160 in synthetics. We go through every one of them on every deal
- There is no de minimis rule. Failure to meet even one criterion will make a transaction ineligible
- We prepare a detailed checklist covering each criterion and make it available before pricing

PCS is authorised by

We have verified transactions for the following deal types

Private/Public

ABCP/Non-ABCP

Warehouses

On-balance sheet lending

Risk Transfer (Article 270)

Synthetic securitisations

Why use PCS?

We have verified STS transactions across Europe

Jurisdictions where PCS has verified STS transactions - correct as of Dec 2024

PCS Verification & Assessment

PCS has implemented a Chinese wall policy between its market outreach and its analytical team

This ensures that the analysis performed by our team is

- Impartial
- Not affected by conflicts of interest or commercial considerations
- In conformity with the requirements of the Regulation

PCS Verification & Assessment Process

Pre-Mandate Preliminary checklist Appropriate documents are You can talk to our Outreach checked against STS/CRR/LCR Team about both criteria technical and commercial matters Analyst will discuss issues if any You may also speak to a member The Preliminary Checklist will of the Analytical Team about provide comfort to the originator generic technical matters that STS is achieved or achievable and may be used in the marketing phase of the transaction Check is conducted against the final execution documentation to check that no last-minute changes impact PCS is mandated the STS status A primary and secondary analyst is Final checklist is completed and STS assigned verification confirmed Work can begin Originator can name PCS in the ESMA notification Mandate - No later than 3 weeks before checklist is Closing required

When should you engage PCS?

True Sale STS Assessments

Why request a CRR assessment?

CRR Assessment

What is a CRR Assessment?

- For a bank treasury investing in a securitisation to allocate to it a lower capital amount, the Capital Requirement Regulation (CRR) requires that:
 - the securitisation be STS and
 - an additional four criteria be met
- To assist bank investors contemplating the purchase of an STS securitisation in fulfilling their internal compliance diligence on the CRR, an originator can mandate PCS to complete a CRR Assessment
- The CRR Assessment is the independent verification of the additional four criteria required to achieve a lower capital requirement

PCS has provided more than 450 CRR assessments since 2019

Why request a LCR assessment?

LCR Assessment

What is an LCR Assessment?

- For a securitisation to count towards a bank's Liquidity Coverage Ratio (LCR), the Capital Requirement Regulation (CRR) requires that:
 - the securitisation be STS and
 - an additional eight criteria be met
- To assist bank investors contemplating the purchase of an STS securitisation in fulfilling their internal compliance diligence on the eligibility for an LCR pool, an originator can mandate PCS to complete an LCR Assessment
- The LCR Assessment is the independent verification of the additional eight criteria required for that securitisation to count towards the bank's LCR

PCS has provided more than 250 LCR assessments since 2019

Why request a Synthetic STS Verification?

Synthetic STS Verification

What is a Synthetic STS Verification?

- Under the amended Regulation (EU) 2021/557 which came into force in April 2021, synthetic securitisations (also called "on-balance-sheet securitisations") may now be STS. This allows originators to allocate a lower capital amount to the retained senior tranche under the CRR
- To be included in this class, these synthetic securitisations need to meet nearly all the STS criteria as well as an additional 40-60 criteria
- STS synthetic securitisations must be notified to ESMA in the same way as STS true sale securitisations and may benefit from the same verification process by authorised third party verification agents
- PCS has been authorised by the French AMF to verify synthetic securitisations
- PCS has been mandated in 15 jurisdictions
- PCS verified or is verifying more than 60 Synthetic STS securitisations

Thank you for your attention
